50X1-HUM

1. The new standard gauge line from Halimba to Ajka is to have four pairs of rails for shunting purposes at the junction of this line and the narrow gauge railroad from the mine.
2. Three pairs have been laid but during the last week in July 1952 it was found that where the fourth pair was to have been, at the point nearest the narrow-gauge line, the foundations have caved in owing to the removal of earth from this area to build up the embankment for the new road which is being built from Szec to Halimba.
